EDUCATION

National University of Singapore
B.Comp. in Computer Science
with minor in Mathematics

2023 - 2027

- Recipient of Science & Technology Undergraduate Scholarship
- GPA: 4.57/5.0 (*Highest Distinction*)
- Selected Coursework:

Principles and Practices of Program Analysis

Formal Specification and Design Techniques

Programming Language Implementation

Compiler Design

Fundamentals of Logic in Computer Science

Logic for Proofs and Programs

BRIEF PERSONAL STATEMENT

I am interested in various aspects of programming languages and software engineering. In particular, I focus on the logical foundations of software, machine/AI-assisted approaches for building reliable software, and next-generation methodologies for understanding and interpreting programs.

WORK EXPERIENCE

PLSE Lab, National University of Singapore
Research Assistant

Jan 2026 - Mar 2026
Singapore

- Worked on an extension over Hoare Logic enabling simultaneous reasoning about program correctness and incorrectness, under the supervision of *Prof. Chin Wei Ngan*; implemented the logic system in Rust.

PLI Lab, National University of Singapore
Research Assistant

Jan 2025 - Dec 2025
Singapore

- Worked on a year-long research project under the supervision of *Prof. Michael D. Adams*. Explored expression-continuation-based interpretation model and implemented *Mini-Mu* in Haskell.
- Selected to present Mini-Mu at SG PL Summit 2025 as the only undergraduate presentation in the program; also received the Bronze Medal at the ICFP 2025 SRC.

Source Academy, National University of Singapore
Researcher & Software Engineer

Aug 2024 - Nov 2025
Singapore

- Added support for *Pie* to Source Academy, a widely used teaching platform at the School of Computing, under the supervision of *Prof. Martin Henz*. Built a web toolkit for interpreting, debugging, and visualizing programs.
- Gained experience in dependently typed theorem provers. Awarded the *Best Project Prize* at 26th STePS.

TEACHING EXPERIENCE

School of Computing, National University of Singapore
Undergraduate Teaching Assistant

Aug 2024 - Present
Singapore

- Conduct weekly tutorials, grade assignments, and provide feedback; with evaluations exceeding department averages.
- CS1231S – *Discrete Structures* (24/25 SEM 1)
- CS2040S – *Data Structures and Algorithms* (24/25 SEM 2, 25/26 SEM 2)

New Oriental Education & Technology Group
Teaching Assistant

Mar 2023 - Jun 2023
Tianjin, China

- Supervised high school students studying mathematics and physics across multiple curricula. Led a class of about 10 students and tracked attendance and homework progress.

AWARDS

- Outstanding Computing Project Prize, *NUS School of Computing*, 2026
- Bronze Medal at ICFP Student Research Competition (Undergraduate Category), *ACM*, 2025
- Best Project Award at the 26th STePS, *NUS School of Computing*, 2024
- Science and Technology Scholarship, *NUS - Ministry of Education*, 2023

PUBLICATIONS

- Client-Server Sessions by Nondeterministic Recursion
Michal Strba, Ding Feng, Michael D. Adams
Submitted to ACM SIGPLAN Symposium on Principles of Programming Languages 2027
- PieLoT: LLM-driven Toolbox for Theorem Proving Education (Research Abstract)
Ding Feng, Li Daoxin, Zhang Qixiang
AI4X-AC Oral 2026
- Mini-Mu: A Language for Understanding Duality (Research Abstract)
Ding Feng, Kyriel Mortel Abad, Michael D. Adams
ACM SIGPLAN International Conference on Functional Programming, SRC Track 2025

INDIVIDUAL PROJECTS

- An automated tool for downloading and uploading from/to multiple target platforms in Go.
- A Rust sub-language's type checker, compiler and a virtual machine. Demonstrating the borrowing and moving semantics in Rust.
- A music player, with various distinct functions including switching between listening modes, AI music recommendation, and soundtrack separation. Based on Flutter and Django.

SKILLS

Programming Languages	<i>Java, Python, Go, Rust, Dart, TypeScript, Haskell, OCaml, Lean, Rocq</i>
Technology Stack	<i>gRPC, Flutter, Django, ReactJS, Docker</i>
